

**Specification amendment**

Please substitute the following paragraph for the paragraph beginning at page 7 line 24 of the application as filed.

In FIG. 4b, another embodiment of the outer actuation component is shown which has substantially similar components to the embodiment of FIG. 4a, however, the drive for the magnet wheel incorporates a belt 94 received around a circumferential groove [96] 95 in the periphery of the magnet wheel and engaging a drive spool 96 received on the axle of the motor. An assembled view of the embodiment of FIG. 4b is shown in FIG. 5b with the case removed to show the internal components.
